

WINIMUSSET WILDLIFE MANAGEMENT AREA

(New Braintree)

SIZE: Two parcels totaling 535 acres. Much of the terrain is gentle to moderately sloping hillside, although roughly half of the western parcel is level bottomland. There is good parking access off **Hardwick/Ravine Road** and **Slein Road**.
U.S.G.S. Quad: North Brookfield

VEGETATION: Mixed hardwood and conifer forest interspersed with agricultural and brushy fields with a few areas of shallow marsh.

WATER: Both parcels contain portions of small, cold water streams, some of which support native brook trout. The Ware River, just northwest of the area, is stocked with trout.

WILDLIFE: Stocked pheasant, grouse, woodcock, coyote, cottontail rabbit, gray squirrel, turkey and numerous nongame species.

SPECIAL

REGULATIONS: Note that a "hunter orange" hat is required wear for hunters during the pheasant season.
