

**GREEN RIVER ACCESS CONSERVATION EASEMENT
(Egremont)**

- Size:** 22 acres of agricultural field along the Green River.
- Access:** No formal parking areas. Two paved aprons along Route 71 are the best access points to the property.
- Vegetation:** The area is under the ownership of the Egremont Land Trust and is operated as agricultural crop land. Typical riparian vegetation, including some mature trees, characterizes the river edges.
- Water:** The property includes the western shoreline of the Green River. The green river is a quality cold water stream with reproducing wild trout populations which is supplemented by stocking for recreational fishing each spring.
- Wildlife:** Because the area is managed as a working agriculture site, wildlife resources may vary depending on the planted crops. Deer, turkey, coyote and small mammals utilize this property. The riparian area may be a corridor for the movements of other wildlife species.
- Special Regulations:** None
