

**WESTFIELD WATERSHED WILDLIFE CONSERVATION EASEMENT**  
(Montgomery & Westfield)

- Size:** 2300 acres abutting the Tekoa Wildlife Management Area. The majority of the property is located south of Main Street in Montgomery.
- Access:** No formal parking areas. Primary access exists from the gate on Tekoa Road and along the roadway on Pitcher Street. Access to the northern section is from Main Street. Additional small access areas exist along roadsides, but care should be taken to ensure that roadways are not obstructed particularly during the winter months.
- Vegetation:** Oaks and Oak/Hardwoods cover much of the area. Old pine plantations are interspersed throughout the property.
- Water:** Two main bodies of water are contained within the WCE, (Westfield and Tekoa Reservoirs). Westfield Reservoir is a 40 acre former water supply with a maximum depth of approximately 25 feet. The reservoir is accessible by walking in from Pitcher Street or Tekoa Road. Shorefishing is available and non-motorized boats that have been carried in are allowed. The fish community is a typical warm water composition with bass, pickerel and panfish. Tekoa Reservoir is a small water body (<2 acres) with an unknown maximum depth. The area also includes multiple wetlands and small swamps as well as a flowing stream.
- Wildlife:** Deer, moose, bear, beaver, coyote, bobcat, turkey, ruffed grouse, cottontail rabbits, and gray squirrels inhabit the area.
- Special Regulations:** No Motorized boats are allowed on the reservoirs
