Knightville Dam Wildlife Management Area

Town: Huntington

Acreage: 0 deeded acres

Wildlife Management Zone: 4N

Description of property:

The Knightville Dam WMA is part of a flood control project and is managed through a cooperative lease agreement with the U.S. Army Corps of Engineers. This dry bed reservoir on the Westfield River is located just south of the Hiram H. Fox WMA. The majority of this property consists of open grass and brush plains with the lands above the floodplain forested in mature hardwoods and softwoods.

Location/Access/Parking:

Limited roadside parking and access is located off of Route 112.

Hunting Opportunities:

This WMA is stocked with ring-necked pheasant and also provides excellent habitat for cottontail rabbit, American woodcock, ruffed grouse, and white-tailed deer.

Fishing Opportunities:

A long section of the Westfield River and a short section of the Little River and portions of other tributaries are located within this WMA. The Little River and the Westfield River are trout-stocked waters. For more information about trout stocking, visit [Mass.gov/Trout](https://www.mass.gov/trout). Given seasonal flood control activities, portions of this WMA may be partially submerged at times.

Special WMA Regulations:

During pheasant season, a blaze orange hat must be worn by all hunters except while night-hunting raccoon or opossum or while hunting waterfowl from within a blind or boat. No person shall hunt before sunrise or after sunset during the open season on pheasant, except for the hunting of raccoon or opossum between 9:00 p.m. and 3:00 a.m.

Depending upon flood control activities, special rules and regulations of the U.S. Army Corps of Engineers may be in effect on this WMA.
